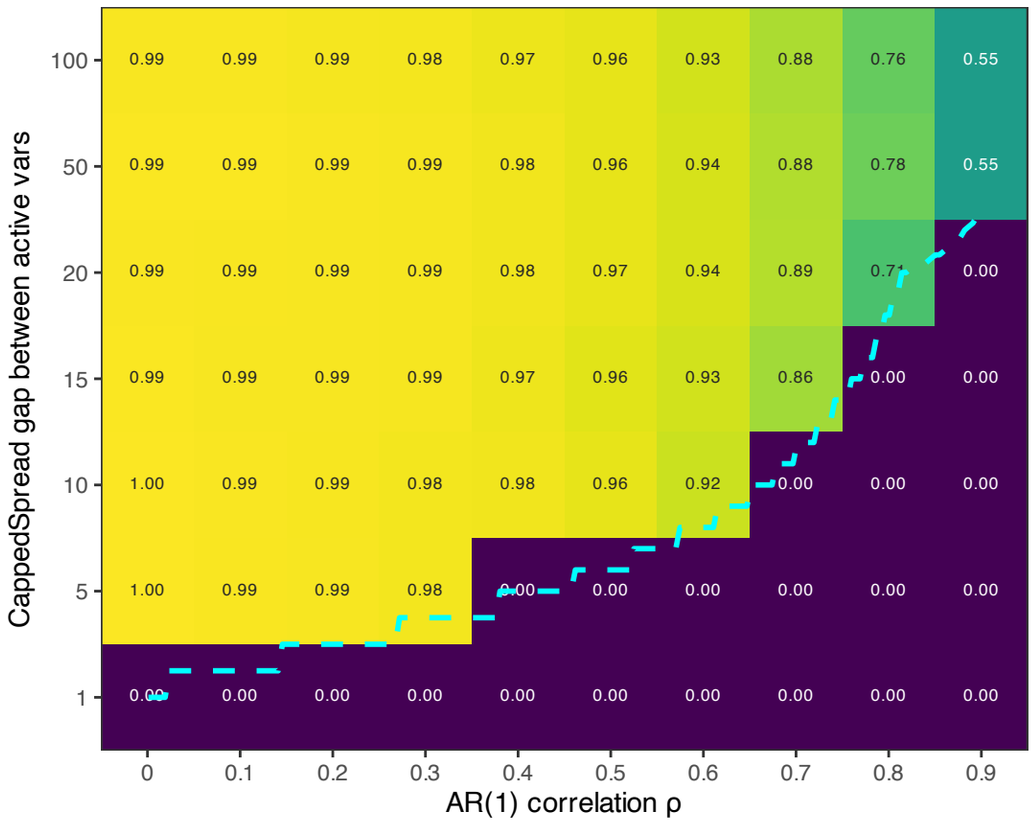
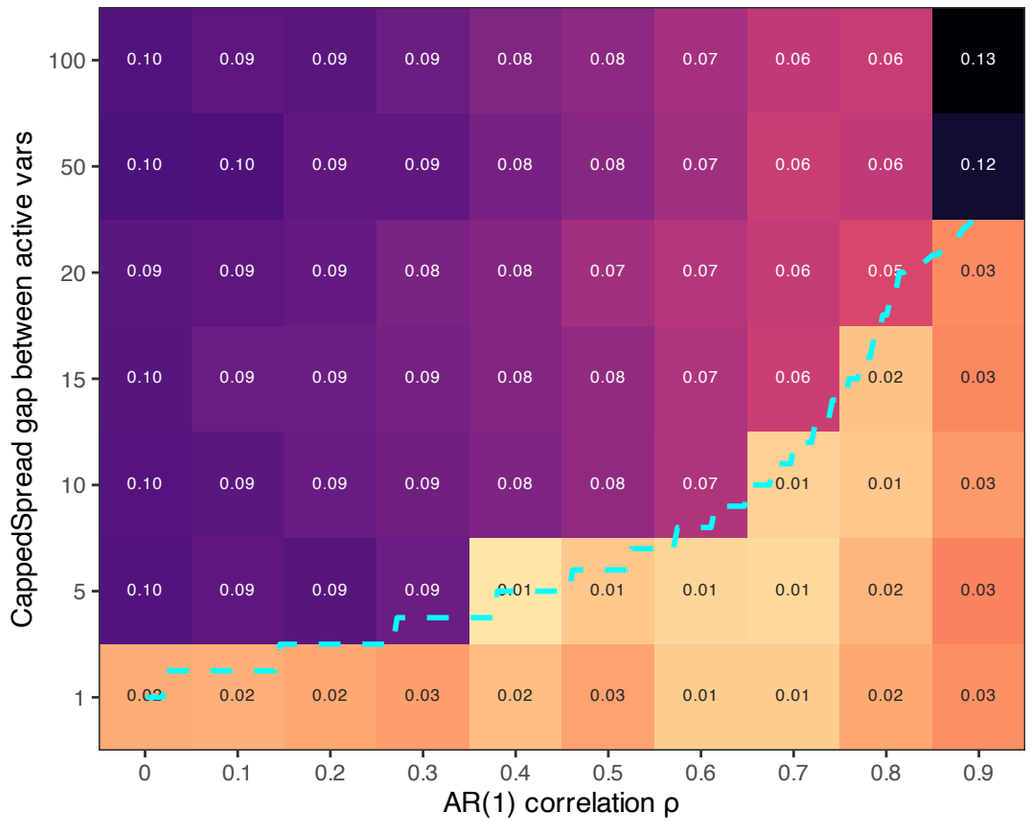
DA-TRex+AR1 on AR(1): support spacing (gap) vs correlation (ρ)
(mean over TREX-DA+AR1: TAFS (rho = 0.3) / TREX-DA+AR1: TLARS / TREX-DA+AR1: TLARS_STAG / TREX-DA+AR1: TOMP)

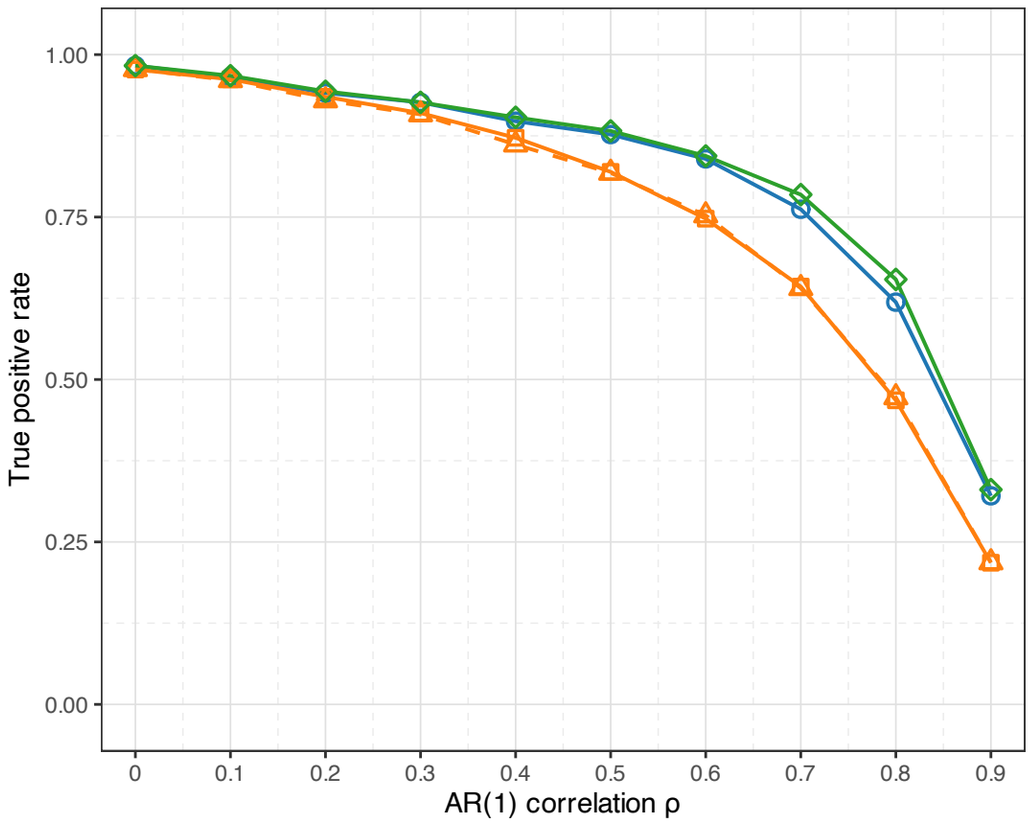
TPR (true positive rate)



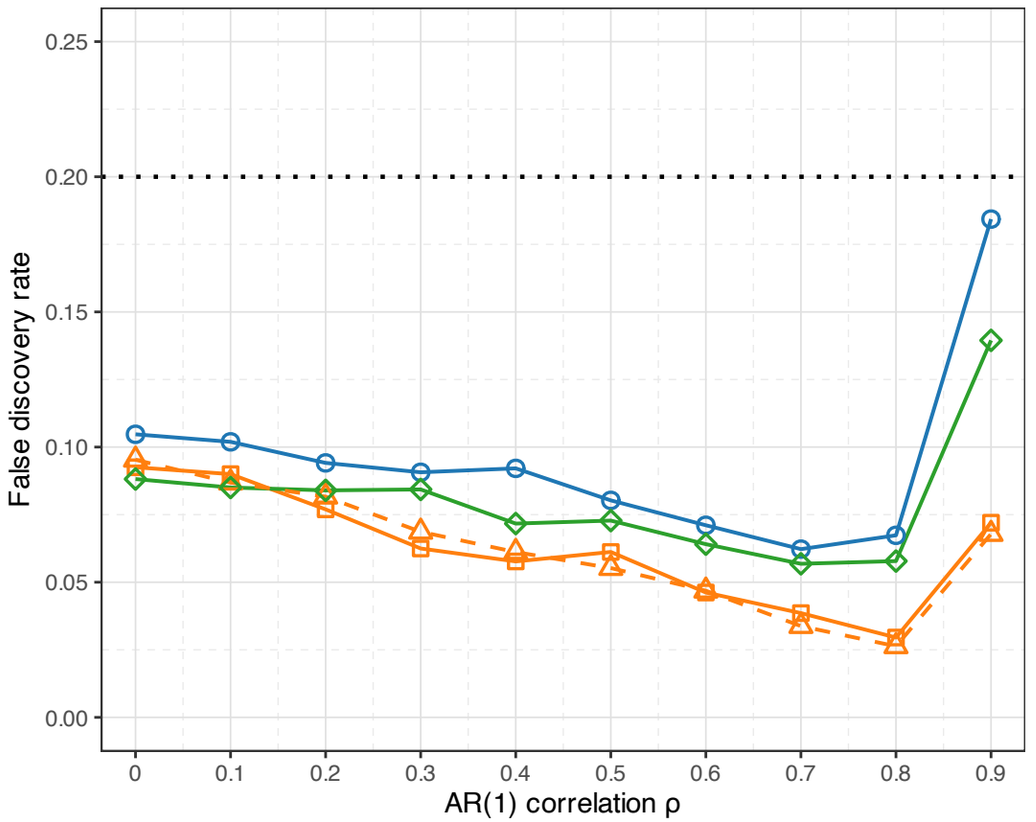
FDR (false discovery rate)

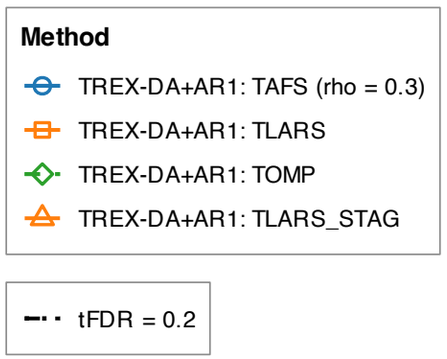


Random support baseline — TPR



Random support baseline — FDR





cyan dashed curve: κ-boundary gap = ⌈log ε / log ρ⌉, ε = 0.02 (DA window, same for all solvers)
